Yunus Fawaz Ayoola

Software Developer · Frontend Specialist · AI Integration

PROFESSIONAL SUMMARY

Frontend-focused software developer with hands-on experience architecting responsive web applications, integrating AI APIs, and shipping functional prototypes under competitive hackathon conditions. Proficient across the full frontend stack — HTML5, Tailwind CSS, JavaScript, Node.js — with a growing backend footprint covering REST API design, database structuring, and payment integration. Consistently delivers production-quality UIs against tight deadlines with zero reliance on templates.

PROJECTS & EXPERIENCE

TutorPro — Full-Stack JAMB CBT Platform

- Engineered a complete exam prep platform with Node.js/Express backend, PostgreSQL database via Prisma ORM, and a responsive Tailwind CSS frontend.
- Implemented JWT authentication, Paystack payment integration, token-based tutor billing, and anti-cheat exam logic with timed sessions.
- Converted multi-year JAMB Past Question archives from PDF into structured databases, uploading 609 question images via a custom automation script.
- Deployed frontend on Netlify and backend on Render with live production traffic.

FlashClaim — React SaaS — AI Insurance Claims

- Architected a 26-file multi-page React application with Vite, Tailwind CSS, Recharts, and React Router simulating an enterprise auto-claims platform.
- Delivered a multi-step claim wizard, AI damage assessment dashboard, admin analytics, and dark/light mode — structured as a recruiter-ready codebase.

BaseCamp — React — Calisthenics Tracker

- Developed a military-themed fitness tracking app in React with Vite, Recharts progress charts, rank progression, and localStorage persistence.

WaPilot — OPay Innovation Challenge 2026

- Co-architected the frontend for an AI-powered WhatsApp commerce and escrow platform targeting Nigerian SMEs, delivering a zero-friction merchant onboarding flow.

Cash Flow — Vanilla JS — Budgeting App

- Built a real-time budgeting tool with vanilla JavaScript, Chart.js visualizations, Naira formatting, toast notifications, and mobile-responsive design.

EDUCATION

BSc Computer Science (200-Level, In Progress)

Expected 2027

University of Lagos, Lagos, Nigeria

- Relevant coursework: Data Structures & Algorithms, Web Technologies, Software Engineering, Database Systems.

ADDITIONAL SKILLS

- Proficient in Microsoft Office — primarily Word (document formatting, templates) and Excel (formulas, data organization, charts).
- Working knowledge of graphic design using Canva and basic photo editing for social media creatives, flyers, and presentation visuals.
